My grill emits smoke during the preheating phase. The color indicator flashes white - what does this mean? The device does not open completely by placing the food on the grill plates before cooking. Solutions: To allow the appliance to detect the start of the cooking cycle, the appliance must be fully opened before each cooking cycle. It can be readjusted by removing it with a clamp. Technical support The appliance has started cooking in Manual mode without me pressing the Manual button. Why? Before cleaning the grill, wait about 45 minutes while the appliance cools. Read the safety instructions! Information If the T-fal Optigrill automatically switches to manual mode without having been selected, it is highly probable that the device is not calibrated. Let the device/heating plates cool. Various topics Where can I dispose of my appliance at the end of its useful life? The grill plates have not been placed correctly on the hooks of the plate and therefore the sensors cannot detect the food correctly. To correct this problem, turn off the appliance and let it cool. When the Optigrill whistles to say it's ready, open the grill again and put the second batch of food on the plates and continue as usual. This can be easily repaired with a clamp. The Steak light will flash 3 times more. You're cooking in manual mode. Do not use abrasive cleaners or products that contain alcohol or fuel, as they may damage the device. "Make sure you have removed the spacer from the plate beforehand! Step 7 (optional) In case the above steps are not successful, it is also possible that the small metal device under the heating plate will get stuck. Leave it at a local municipal waste collection point. Next, install the cooking plate properly. It started cooking before the preheating was over. To rectify: turn off the appliance, remove the food, close the lid and wait until the preheating is over. Turn the appliance back on, select then confirm a programme and wait until preheating has finished. If the problem persists despite adhering to the advice above: the appliance may need to be repaired. The temperature remains approximately at 250°C. What is the cooking temperature of the grill plates in Manual Mode? The appliance needs to be repaired. You must monitor and check the food yourself throughout cooking. No as the cooking sensors are not active in manual mode. If your food is under 4 mm thick, it is too thin (like bacon slices), it may not be detected. This is not a problem simply press the OK key for confirmation for cooking to start. Then plug the cable back in and turn on the device by pressing the power button. Your appliance contains valuable materials which can be recovered or recycled. To remove heavy food residue on the grill plates or on the side, we recommend you use a wooden or plastic spatula. Step 5 Close the lid and press the Steak button again. Can I use the frozen food setting when cooking in the manual mode? Where can I buy accessories, consumables or spare parts for my appliance? If you leave the appliance open between 2 cooking cycles it will turn to safety mode and will have to be reset. To ensure the best cooking results, you should not open the appliance for more than 1 minute during cooking cycles. Step 6 Unplug the power cable and wait for approx 1 minute. Step 4 Open the lid and place a small spacer on the heating plate. Do not immerse the grill in water. To avoid any danger, have it replaced by an approved repair centre. What are the warranty conditions of my appliance? Do not use your appliance. The colour indicator remains solid white - what does this mean? If it still does not work, do not try to dismantle or repair the appliance yourself, instead, take it to an approved repair centre. What should I do if the feeding cable of my device? You do not have to turn off the grill first. No. Once the first batch is over, open the grill completely and remove the food. Restart unplug it for 2-3 minutes and restart the complete cooking cycle. Then the Steak light remains on. Since heating plates are not heated, you can use a spacer made of plastic. When the lights flash again, choose the mode you want. Reconnect the power cord, but do not turn on the device by pressing the power button. This may be due to an inadequate cleaning of the cooking plates. We recommend that you previously wash the cooking plates as follows before putting them in the dishwasher to eliminate any food residue: - Dip the plates in hot water and degrease the soap for dishes for about 30 minutes; - Rub both sides of the Plate with a sponge or a brush for dishes, hot water and soap for degreasing dishes; - Rinse; - Put in the dishwasher. Step 3 Press and hold the following three buttons for approximately 3 seconds simultaneously: Hamburger + Fish + Manual. Handbook.
